

USRA 40' Boxcar Pack (Northeastern Roads) for RS.com's RailWorks(2) by Golden Age of Railroading

The USRA 40' boxcar is one of *the* classic boxcars of the first half of the 20th century. Under the flag of the nationalized railroad system between 1917 and 1920, thousands of standardized freight cars and locomotives were produced handle the wartime and post-war freight traffic boom. Many of the USRA designs proved so successful that they remained in production long after the railroads had been handed back to their original owners again.

This add-on for Railworks includes the USRA 40' boxcar in two versions: double-sheathed cars with wooden doors and single sheathed cars with wooden doors. All cars come with the USRA standard steel ends.

Various road names of a (north) eastern origin are included in this pack: B&M, DL&W, Erie, L&NE, LV, NKP, NYC, P&LE, PRR, RDG and RUT.

Purchase, Shipping and Returns, Troubleshooting:

On our website you will find a “[Buy Now](#)” button next to each item which is for sale. Clicking on these buttons will add the selected items to a PayPal checkout window. If you want to buy the selected add-on, please follow the instructions in the pay-pal window to complete the checkout process.

Golden Age of Railroading only accepts [Paypal](#) as method of payment.

Your order will be shipped as a download, typically a Railworks RWP file, after Paypal has processed your payment. The download links will be emailed to you as soon as possible, but please allow up to 24 hours to send the email. If you do not hear from us within this time, please send an email to: support@golden-age-rails.com

Returns: As our products are downloads, we cannot offer you refunds as you cannot return the product. In case our products do not work properly or you encounter problems of any sort using our products, we will of course try our best to find a solution and get things to work as they should.

System Requirements and Installation:

System Requirements: You need to have installed RailWorks, there are no special hard- or software requirements which would go beyond those of the game itself.

Installation:

1. Download the .RWP file and save it in a secure place on your hard disk – just in case you might have to reinstall the cars at a later time.
2. Launch [RailWorks](#) and select the [Package Manager](#) on the Welcome Screen.
3. Click the [Install](#) button, browse to the file from step one, click [Open](#). The package will be installed now, after which you can already run your new cars in the game!
4. To be able to place the cars in a scenario, you will first have to enable the [object filter](#) (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer "[GreatNortherner](#)", product "[SteamEra](#)"
5. You will now find the cars in the assets browser, listed under "[Boxcar 40ft-USRA ...](#)"
6. All cars will be empty right after placing them in the scenario editor. To load a car, double click on it. When it is highlighted in dark red, tick the little 'cargo' checkbox in the right flyout window. You can also do this for entire consists in one go, all you need to do is to switch on the 'consist select' radio button in the lower left flyout window.
