

# NP Morning Passenger Round Trip for MCSA

A two-part scenario simulating an early morning local passenger from Camden to Moscow and back. Quite challenging as the steep grades will test your skills as an engineer, having to keep the speed up all the time to keep your tight schedule. Requires several freeware and one payware download, or the use of RW\_Tools to substitute any missing rolling stock items. By Michael Stephan

## **Add-ons needed to run this scenario:**

*Read this if you do not want to download (or buy!) and install quite so many files: With the help of Mike Simpson's (donationware) RW\_Tools suite of utilities you can quite easily substitute any piece of equipment used in this or any other scenario. Please read on here for more information about RW\_Tools: [www.rstools.info](http://www.rstools.info)*
