

Bay of Quinte 'NS Local' Scenario 4-Pack

Enjoy five hours of switching and wayfreight challenges with these four consecutive scenarios, playing through a eight-hour shift on a fictional NS branchline on the Bay of Quinte route. You will be servicing several industries on the Napanee branch, the gravel pit, the ethanol plant, and have to do a lot of yard switching. Your work orders will be given with only limited instructions and a bit of help from your conductor, so this will be a fairly challenging run. Please note, this is an updated re-release of this scenario pack. It has been updated for RW3-ready equipment and some bugs have been ironed out.

By Michael Stephan

Add-ons needed to run this scenario:

Read this if you do not want to download (or buy!) and install quite so many files: With the help of Mike Simpson's (donationware) RW_Tools suite of utilities you can quite easily substitute any piece of equipment used in this or any other scenario. Please read on here for more information about RW_Tools: www.rstools.info
